

NEW FROM OXFORD

British Paediatric Association Manual on Infections and Immunizations in Children

Edited by Angus Nicoll and Peter Rudd

The unsatisfactory uptake of immunization in the UK is a major reason for the continuing morbidity of childhood infectious disease. This handbook summarizes the important childhood infections and gives simple, practical advice on current immunization and treatment.

Immunization in Practice

World Health Organization

This training manual explains what peripheral health workers need to know about vaccination. It describes and illustrates the necessary skills, and is written in simple English. Practical exercises and a teacher's guide are included.

The State of the World's Children 1989

Edited by James P. Grant

A reversal of economic growth in large areas of the Third World is severely threatening their development. This report calls for a development pact between industrialized and developing nations, which should benefit the growth of both while dramatically improving nutrition, water, sanitation, health care, and education in the poorest countries.

Programmes to Promote Breastfeeding

Edited by Derrick B. Jelliffe and E. F. Patrice Jelliffe

Experts from different parts of the world here give accounts of breastfeeding programmes in their own countries, and there is an assessment of policy needs and strategies for the future.

International Incidence of Childhood Cancer

Edited by D. M. Parkin, C. A. Stiller, C. A. Bleiber, G. J. Draper, B. Terracini, and J. L. Young

Information on childhood cancer incidence in over 50 countries is assembled in this IARC volume. The extensive data are presented in an accessible format to assist comparisons. A special classification system is used, based on the cellular origin of the tumours—this is more relevant than the traditional classification by anatomical site.
